SEVERE THUNDERSTORMS AND LIGHTNING

If you are caught outdoors in a severe thunderstorm or when lightning threatens:

1. Immediately seek shelter in a substantial building.
   - DO NOT seek shelter under trees during thunderstorms.
   - DO NOT seek shelter in unprotected open structures such as picnic pavilions, rain shelters or bus stops.
   - If a substantial building is not available, a metal-topped vehicle with the windows up is your next best choice.
2. Avoid contact with metal fences, metal bleachers, or metallic structures.
3. Avoid using the telephone or any electrical appliances. Use phones ONLY in an emergency.
4. Do not take a bath or shower during a thunderstorm.
5. Wait 30 minutes or more after hearing the last thunder before leaving the safe location

If Caught Outdoors and No Shelter Is Nearby:

- Find a low spot away from trees, fences, and poles that is not subject to flooding.
- If you feel your skin tingle or your hair stand on end, squat low to the ground on the balls of your feet. Place your hands over your ears and your head between your knees. Make yourself the smallest target possible and minimize your contact with the ground. DO NOT lie down. If you are swimming, get out of the water immediately.

REMEMBER: If you can hear thunder, you are close enough to be struck by lightning.

Once you have taken shelter indoors, you should monitor a weather radio, commercial radio/television station, internet or other weather service provider. Even when a specific storm cell has passed beyond the area, conditions may still be right for high winds, lightning, and other hazardous weather conditions. In an emergency dial 9-1-1. New Brunswick 732-932-7111, Newark 973-353-5111 or 973-972-4491, Camden 856-225-6111.

New Brunswick/Piscataway Campuses utilizes Lighting Detection Systems to detect and announce the proximity of lighting. The Lighting Detection System covers the large recreation and athletic fields, stadium and the golf course on the Busch and Livingston Campuses. The system will activate an audible horn alarm to announce the proximity of lighting. All activities on the fields **SHALL** be suspended and everyone must locate appropriate cover until the storm has passed.
